Thanks, Eugenia. Would you be able to send us Tierra's responses to comments so we can put EPA's resolution in context? Thanks. Geoff

Subject: NBSA -EPA review of PFD rtc

Carlie,  
Find enclosed EPA's final resolution on the comments to the Problem Formulation Document. Please submit a revised version of the document by April 30 2013.  
As I mentioned to you during our 2/22/2013 meeting, the EPA expects Tierra to start the biota sampling for risk assessment in the Fall of this year. Should Tierra not be able to conduct the risk assessment data collection in the fall of 2013, the EPA plans to conduct the sampling itself and will bill Tierra for this effort as part of the oversight of the NBSA RI/FS.  
I should also mention, that the EPA team has reviewed the Lower Passaic planning documents for applicability to Newark Bay risk assessment data collection. I will send you the results of our review to date next week for your information.  
Let me know if you have any questions or wish to discuss,
